

STELMAKH_CORP — Enterprise Business Core for PostgreSQL

Corporate-grade data architecture for ERP, CRM, HRM, FinTech and GovTech systems

Perpetual License: 10 000 USD per installation

STELMAKH_CORP is a unified enterprise data architecture designed for companies, holdings and multi-unit organisations.

It provides a complete, production-ready PostgreSQL business core covering legal entities, finance, documents, employees, assets, units and administrative domains.

This architecture eliminates months of design work and serves as a ready-to-use foundation for software companies, integrators, startups and enterprise development teams.

Key Advantages

- Enterprise-grade architecture validated in real ERP usage
- Fully normalised 3NF+ model with strict referential integrity
- Modular domain structure (logical domains inside unified public schema)
- Hundreds of ready business entities with complete FK mapping
- Scalable multi-unit business model (holding → company → branch → unit)
- Optimised for PostgreSQL 15–18+
- Ideal foundation for corporate data systems (ERP/CRM/DMS/HR/Finance)

Domain Architecture (Logical Model)

Legal Entities

t_legal_entity

t_legal_entity_bank_account

t_legal_entity_activity

Documents & Workflow

t_document
t_document_type
t_document_subtype

What You Get

Full PostgreSQL schema (SQL dump)

This product provides a data architecture only. Application-level ERP logic is not included.

ERD diagram (grouped by domains)

Domain documentation

Installation guide

Commercial license

Production-ready architecture

Installation

`CREATE DATABASE stelmakh_corp;`

Import the schema:

`psql -U postgres -d stelmakh_corp -f stelmakh_corp_core.sql`

System Requirements

Database Engine

- PostgreSQL 18+
- Fully tested on PostgreSQL 18.4.2

Hardware

- Minimum: 2 GB RAM, 50 MB disk
- Recommended: 4 GB RAM, SSD storage

Supported OS

- Windows 10/11
- Linux (Ubuntu, Debian, CentOS, RedHat)
- macOS (Intel & Apple Silicon)

Client Tools

- psql
- pgAdmin 4
- DBeaver
- DataGrip
- TablePlus

Deployment Environments

- Local development
- On-premise servers

Use Cases

- Enterprise software development
- Corporate system integration
- Startup platforms

- Internal tools
- Financial & administrative systems
- Document management
- Multi-unit business operations

Licensing

Commercial Single-Server License

- Perpetual
- Non-transferable
- Internal use only
- No redistribution or SaaS usage
- Additional servers require additional licenses
- Full license text included in /Docs/Stelmakh© Corp™ LICENSE.pdf.

Integration, adaptation and ERP implementation are not part of this product and are not permitted under the Commercial Single-Server License.

Modification Rights (Internal Use Only)

The Licensee may:

- extend the database schema
- add new tables, fields, indexes or domains
- integrate the architecture into internal corporate systems
- adapt the structure for internal business processes

All modifications are permitted **only within the Licensee's own infrastructure** (one physical or virtual server per license).

The STELMAKH_CORP Business Core may be installed, used and modified only on a single physical or virtual machine per license.

Any use outside this single machine — including cloud deployment, SaaS integration, redistribution or embedding into commercial products — is strictly prohibited.

The Licensee is strictly prohibited from:

- incorporating the architecture into any commercial product
- using it in SaaS, cloud or multi-tenant services
- redistributing modified or original versions
- creating derivative or competing database products

All usage is limited to **internal, non-commercial distribution** within the Licensee's organization.

Pricing

Package	Price
Perpetual License (1 server)	10 000 USD
